Overview. In the scientific method, an experiment is an empirical procedure that arbitrates competing models or hypotheses. Researchers also use experimentation to test existing theories or new hypotheses to support or disprove them.. An experiment usually tests a hypothesis, which is an expectation about how a particular process or phenomenon works.. However, an experiment may also aim to ...

A theory is a contemplative and rational type of abstract or generalizing thinking, or the results of such thinking. [better source needed] Depending on the context, the results might, for example, include generalized explanations of how nature works. The word has its roots in ancient Greek, but in modern use it has taken on several related meanings. ...

What Is Meditation? Meditation is a mind and body practice that has a long history of use for increasing calmness and physical relaxation, improving psychological balance, coping with illness, and enhancing overall health and well-being. Mind and body practices focus on the interactions among the brain, mind, body, and behavior. A new report based on data from the 2017 National Health ...
