Industrial Gases Production, Equipment Supply and Services. Universal Industrial Gases (UIG) is a designer, manufacturer, supplier, installer and operator of industrial gases production and supply systems. Its product portfolio includes air separation plants, cryogenic oxygen plants, cryogenic nitrogen plants, liquefiers, and compressed dry air systems.

An air separation plant separates atmospheric air into its primary components, typically nitrogen and oxygen, and sometimes also argon and other rare inert gases.. The most common method for air separation is fractional distillation. Cryogenic air separation units (ASUs) are built to provide nitrogen or oxygen and often co-produce argon.

Gravity separation is an industrial method of separating two components, either a suspension, or dry granular mixture where separating the components with gravity is sufficiently practical: i.e. the components of the mixture have different specific weight. All of the gravitational methods are common in the sense that they all use gravity as the dominant force.
