The terms shell collector and conchologist can be regarded as two distinct categories. Not all shell collectors are conchologists; some are primarily concerned with the aesthetic value of shells instead of their scientific study. It is also true that not all conchologists are shell collectors; this type of research only requires access to private or institutional shell collections.

A seashell or sea shell, also known simply as a shell, is a hard, protective outer layer created by an animal that lives in the sea. The shell is part of the body of the animal. Empty seashells are often found washed up on beaches by beachcombers. The shells are empty because the animal has died and the soft parts have been eaten by another animal or have decomposed.

Since Super Mario World was supposed to take place in Dinosaur Land, Hino initially designed a reptile similar to a large lizard. Since the initial design felt out of place, Tezuka redesigned him by making a rough sketch that then Hino polished. During the redesign, Tezuka tried making Yoshi related to turtles, with the saddle actually being his shell.
